

**You may always think of your son or daughter as a child, but when they become an adult at the age of 18 the rights and responsibilities you had as a parent belong to your child.**

**These are big changes for both you and your child especially if they have a disability that effects their decision making.**

**Join us to learn how to get ready and be prepared!**

- How do I obtain SSI & Medicaid?
- Do I need guardianship for my child?
- What is the Division of Developmental Disabilities and how do I obtain their services?
- Can my child work and still maintain services?
- Who will advocate for my child when I'm gone?
